## THATCHAM APPROVED BUMPSTOP

Since we last looked at Bumpstop's innovative bike holder-cum-stand they've been hard at work responding to customer requests for a ground anchor version. In the last six months they've developed this certified ground anchor which carries full Thatcham approval. So not only does it keep your bike upright in the van, on a trailer or in your garage – the addition of the ground anchor section should mean your bike will stay exactly where you left it. The Bumpstop comes

with the bolts to secure it and then your chain (one can be supplied at additional cost) prevents them from being removed so the unit stays securely in place. Additional wheel cups are available to allow the Bumpstop to be used with both vintage and modern machines.

**Price:** £135.13
