

## Bumpstop Bikestand

**BUMP...** and stop; it couldn't be any easier really. Secure, stable and lightweight, the British manufactured Bumpstop is one of those products you really can't do without. Primarily designed to retain a bike upright in a fixed position, the product also comes in handy by allowing 360° working access around a machine. Fitment is easy and bikes big or small are catered for – you can even put a bike in backwards. There's also the option of a smaller or larger sub-plate, meaning the stand can be used just about anywhere from the back of a van to a trailer or the garage floor at home. The basic product is priced at £99 plus VAT, with the additional small or large sub-plates an extra £15 plus VAT.

For more details, take a look on the Bumpstop website – [www.bumpstop.co.uk](http://www.bumpstop.co.uk) or call 01604 845050.
